# “Rainforest Remnants- Hands on Maintenance and Restoration”

This is a practical based workshop that will enable project participants to get involved with maintenance of their project sites.

**September 26<sup>th</sup> 2015**

**9 AM to 1 PM**

**Hosts: Ian and Trish Gillies, Tuntable Creek and Wallace  
Roads, The Channon.**

Meeting place and directions:

From the township of The Channon travel towards Tuntable Creek to the Wallace Road turnoff (just under 1 KM). Travel along Wallace Road for approximately 250m and turn right to the meeting place.

### Topics and activities

During the workshop we will view a planting area within the project site that has had woody weed control works. Discussion and demonstration will lead us to an area that has not yet had weed control works whereby you can watch and then get involved in basic weed control works.

Trainer: Bernd Zigel

Address by Martin Novak- SFFA President.

Planning woody weed control works and seasonal conditions impacts.

Site preparation and planting, minimal versus maximum impacts.

Carrying out maintenance works, hand weeding, spot spraying

Identification of common tree species

Identification of common weed species

### What to bring

Wear study boots, sunhat, appropriate clothing (long pants and shirts, gloves) and water

Morning tea supplied

Numbers limited to 25/ Registration details: Please register your interest by emailing Bernd Zigel on [berndgzigel@gmail.com](mailto:berndgzigel@gmail.com)
